

Investor diagnostic

Investment readiness summary

Educational note

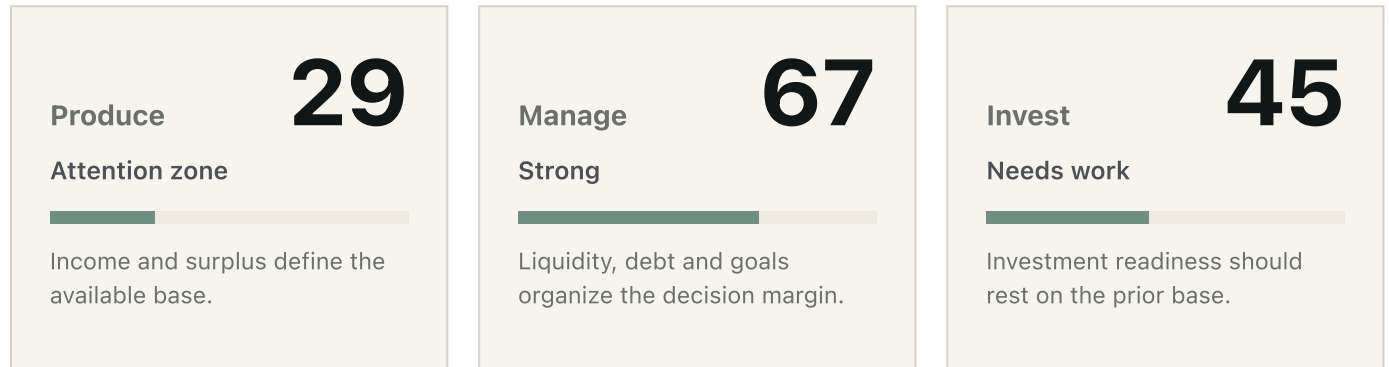

Educational read generated from your answers. It is not financial advice, a personalized recommendation or a formal regulatory assessment.

Orientative profile	Prudent balance
Stage	Order
Readiness signal	Organize first
Main area to strengthen	low emergency fund
Next educational step	Before taking more risk, reinforce the emergency fund and available liquidity.

Investment readiness

Structure first. Risk exposure after.

This read separates financial base, money management and readiness to take risk.

Reading note

Even with signs of investment understanding, income/liquidity foundations limit readiness to take more risk.

Next educational step

Before taking more risk, reinforce the emergency fund and available liquidity.

The goal is to help you identify attention areas, current readiness and educational next steps before taking more risk.

Profile and main tensions

The orientative profile summarizes response patterns. The under-pressure profile matters more when losses, liquidity, time and behavior appear.

Orientative profile

Prudent balance

Under-pressure profile	Prudent balance
Loss capacity	Limited
Validated knowledge	Basic
Complexity to review	Moderate

Main alerts and tensions

01 Structure	Income fragility: separate financial stability from investing decisions.
02 Structure	Low emergency fund: the liquidity base needs work.
03 Structure	Liquidity fragility: a loss could affect real spending or decisions.
04 Behavior	FOMO or social comparison sensitivity appears.
05 Behavior	Fast gains could push position size too early.
06 Knowledge	Basic knowledge gaps appear versus what was declared.
07 Behavior	Written rules are missing for drawdowns, rallies or stagnation.
